PROFESSIONAL SUMMARY

I'm a self-taught developer from Lahore and the founder of Ninja Tech. I like taking an idea all the way to a live website, so I handle the design, the code, the database and the hosting myself. So far I've built online stores, business sites and a few AI tools that real businesses use day to day. I work in custom code, mostly React, Node and Supabase, and I stay on after launch to fix things and keep them running. Whatever a project needs, I'm happy to learn it.

TECHNICAL SKILLS

Front-End	React, JavaScript, HTML5, CSS3, Tailwind CSS, responsive design
Back-End	Node.js, Express, REST APIs
Database	Supabase (PostgreSQL)
AI / Bots	DeepSeek, Gemini Vision, Claude API, Qwen-VL, chatbot development, WhatsApp Cloud API
Deploy / Tools	Railway, Git & GitHub, Namecheap domains, Netlify
Platforms	WordPress, Shopify (basic)
Design	Photoshop, CorelDraw, UI / web design

SELECTED PROJECTS

VÉLIN • E-Commerce

A custom-built online store for a Lahore clothing and bridal-wear brand. Hand-coded rather than made with a builder, with WhatsApp ordering, and live on its own domain.

NexaBot • AI SaaS

An AI chatbot businesses can add to their own website. Each client gets their own bot with its own knowledge base, and it answers customers automatically.

Kids Emporium • E-Commerce

An online store for kids' products with a full cart and checkout, plus an admin panel so the shop owner can manage everything. Live on Railway.

Munshi Jee • Web App

A ledger app for cloth traders who would rather talk than type. They speak an entry in Urdu or Punjabi and it records it, with WhatsApp reminders and cloud backup.

OddexVibe • Web App

A gamified trading and community platform with an AI news commentator, moderated chat, daily streaks and a live player count.

Mr Khan Auto • Client Site

A fast, single-page website I built for a car-accessories shop in Lahore to show their products and take customer enquiries.

SAIMA-BOT • Automation

WhatsApp automation built on the official Meta Cloud API, with auto-replies, business messaging and a token setup that does not expire.

Ninja Tech • Studio

My own web and AI studio, where all of this work lives. One developer taking each project from first design to a live custom domain.

EDUCATION

Bachelor's, 2011–2012 (incomplete)
Matriculation (Computer Science), 2007
Full-stack & AI development, self-taught through continuous hands-on project work

LANGUAGES & AVAILABILITY

Languages: English, Urdu, Punjabi | Timezone: PKT (UTC+5), remote-friendly
Open to remote full-time roles and freelance / contract projects.
